

Serial No.: 09/923,844  
Group Art Unit: 1638

**Table 1. Primers used for isolation of cDNA fragments  
in the differential display assay**

Gene	Primer	Sequence	SEQ ID NO:
chitinase	T12MC	CMAAAAA-(A) <sub>n</sub>	7
	AP-4	5'- GGTACTCCAC - 3'	
LTP	T12MC	GMAAAAA-(A) <sub>n</sub>	8
	AP-2	5'- GACCGCTTGT - 3	

In the Drawings

As requested by the Examiner, Figures 4 and 5 have been amended to include sequence identifiers. The proposed amendments to the drawings are attached, as required under 37 CFR §1.121(d). Upon approval of the amendments by the Examiner, and upon notification of allowable subject matter, formal drawings in compliance with 37 CFR §1.84, including the changes, will be filed.

Remarks

Table 1 has been amended to include sequence identifiers as requested by the Examiner. Support for this amendment can be found on page 54, lines 23-26. Applicants point out to the Examiner that primer T12MC is less than 10 nucleotides in length and therefore has not been included in the sequence listing and, accordingly, it does not have a sequence number identifier.

Figures 4 and 5 have been amended to include sequence identifiers as requested by the Examiner. Support for the amendments to the Figures can be found on page 33, lines 1-5.

No new matter has been added by way of amendment.

Response to Restriction Requirement

The Examiner has required restriction to one of the following inventions:

- I. Claims 1-14, drawn to a promoter, constructs comprising that promoter, cells and plants transformed with the constructs, and a method of using the constructs to induce
